**Experiment 8: MedCare Hospital Appointment Booking System**

**Aim**

To develop an online hospital appointment booking system that allows patients to search for doctors, book appointments and view appointment history.

**Program Code**

```
<!DOCTYPE html>
<html>
<head>
<title>Hospital Appointment</title>
</head>
<body style="text-align:center;background:lightcyan">
<h2>MedCare Hospital</h2>
<input id="patient" placeholder="Patient Name"><br><br>
<select id="doctor">
<option>Cardiologist</option>
<option>Dentist</option>
<option>Dermatologist</option>
<option>General Physician</option>
</select><br><br>
<input id="date" type="date"><br><br>
<button onclick="appointment()">Book Appointment</button>
<h3 id="result"></h3>
<script>
function appointment() {
  let p = document.getElementById("patient").value;
  let d = document.getElementById("doctor").value;
  let date = document.getElementById("date").value;
  if(p === "" || date === "") {
    alert("Enter all details");
  }
  else {
```

```
        document.getElementById("result").innerHTML =
        "Appointment Confirmed!<br>" +
        "Patient: " + p + "<br>" +
        "Doctor: " + d + "<br>" +
        "Date: " + date;
    }
}
</script>
</body>
</html>
```

**Sample Input**

- Patient Name: Ravi, Doctor: Cardiologist, Date: 19-12-2026

**Sample Output**
