Experiment 9: TechSavvy Online Electronics Shopping System

Aim

To develop an online electronics shopping website that allows customers to browse products, search items, add products to a cart and place orders.

Program Code

```
<!DOCTYPE html>
<html>
<head>
<title>TechSavvy Shopping</title>
</head>
<body style="text-align:center;background:aliceblue">

<h2>TechSavvy Electronics Store</h2>

<select id="product">
<option value="15000">Mobile - Rs.15000</option>
<option value="50000">Laptop - Rs.50000</option>
<option value="2000">Headphones - Rs.2000</option>
</select><br><br>

<input id="qty" type="number" placeholder="Quantity"><br><br>

<button onclick="buy()">Add to Cart</button>

<h3 id="result"></h3>

<script>
function buy() {
   let price = Number(document.getElementById("product").value);
   let qty = Number(document.getElementById("qty").value);
```

```
    if(qty <= 0) {
        alert("Enter valid quantity");
    }
    else {
        let total = price * qty;
        document.getElementById("result").innerHTML =
        "Product Added to Cart!<br>" +
        "Total Price: Rs." + total;
    }
}
</script>

</body>
</html>
```

Sample Input

- Product: Laptop
- Quantity: 1

Sample Output
