Experiment 2: Online Hotel Room Booking System

Aim

To develop an online hotel room booking website that allows users to search for hotels, check room availability, book rooms and manage reservations.

Program Code

```
<!DOCTYPE html>
<html>
<head>
<title>Hotel Booking</title>
<style>
body {
   font-family: Arial;
   background: lightyellow;
   text-align: center;
}
.container {
   background: white;
   padding: 25px;
   margin: 50px auto;
   width: 400px;
}
input, button {
   padding: 10px;
   margin: 8px;
}
button {
   background: green;
   color: white;
}
</style>
</head>
```

```
<body>
<div class="container">
<h2>Hotel Room Booking</h2>
<input id="name" placeholder="Customer Name"><br>
<input id="date" type="date"><br>
<select id="room">
<option>Single Room</option>
<option>Double Room</option>
<option>Deluxe Room</option>
<option>Suite Room</option>
</select><br>

<button onclick="bookRoom()">Book Room</button>

<p id="result"></p>
</div>

<script>
function bookRoom() {
   let name = document.getElementById("name").value;
   let date = document.getElementById("date").value;
   let room = document.getElementById("room").value;

   if(name === "" || date === "") {
      alert("Enter all details");
   }
   else {
      document.getElementById("result").innerHTML =
      "Booking Successful!<br>" +
      "Name: " + name + "<br>" +
      "Room: " + room + "<br>" +
```

```
        "Date: " + date;
    }
}
</script>

</body>
</html>
```

Sample Input

- Customer Name: Priya
- Date: 15-12-2026
- Room Type: Deluxe Room

Sample Output
