Experiment 3: Online Bus Ticket Booking System

Aim

To develop an online bus ticket booking system that allows users to search buses, check available seats, book tickets and cancel reservations.

Program Code

```
<!DOCTYPE html>
<html>
<head>
<title>Bus Ticket Booking</title>
</head>
<body style="text-align:center;background:lightcyan">

<h2>Online Bus Ticket Booking</h2>
<input id="source" placeholder="Source"><br><br>
<input id="destination" placeholder="Destination"><br><br>
<input id="name" placeholder="Passenger Name"><br><br>
<select id="bus">
<option>Volvo</option>
<option>Sleeper Coach</option>
<option>Express Bus</option>
</select><br><br>
<button onclick="book()">Book Ticket</button>
<h3 id="result"></h3>
<script>
function book() {
   let s = document.getElementById("source").value;
   let d = document.getElementById("destination").value;
   let n = document.getElementById("name").value;
   let b = document.getElementById("bus").value;
   if(s === "" || d === "" || n === "") {
      alert("Please enter all details");
```

```
    }
    else {
        document.getElementById("result").innerHTML =
        "Ticket Booked Successfully!<br>" +
        "Passenger: " + n + "<br>" +
        "Route: " + s + " to " + d + "<br>" +
        "Bus: " + b + "<br>" +
        "Booking ID: BUS1001";
    }
}
</script>
</body>
</html>
```

Sample Input

- Source: Chennai
- Destination: Bangalore
- Passenger Name: Arun
- Bus: Volvo

Sample Output
