Experiment 7: Online Beauty Parlour Appointment Booking System

Aim

To develop an online beauty parlour appointment booking website that allows customers to view services, select stylists and book appointments.

Program Code

```
<!DOCTYPE html>
<html>
<head>
<title>Beauty Parlour Booking</title>
</head>
<body style="text-align:center;background:lavenderblush">

<h2>Beauty Parlour Appointment</h2>
<input id="name" placeholder="Customer Name"><br><br>
<select id="service">
<option>Hair Cut</option>
<option>Facial</option>
<option>Hair Spa</option>
<option>Makeup</option>
</select><br><br>

<input id="date" type="date"><br><br>
<input id="time" type="time"><br><br>

<button onclick="book()">Book Appointment</button>
<h3 id="result"></h3>
<script>
function book() {
  let n = document.getElementById("name").value;
  let s = document.getElementById("service").value;
  let d = document.getElementById("date").value;
```

```
    let t = document.getElementById("time").value;
    if(n === "" || d === "" || t === "") {
        alert("Fill all details");
    }
    else {
        document.getElementById("result").innerHTML =
        "Appointment Booked Successfully!<br>" +
        "Name: " + n + "<br>" +
        "Service: " + s + "<br>" +
        "Date: " + d + "<br>" +
        "Time: " + t;
    }
}
</script>
</body>
</html>
```

Sample Input

- Customer: Priya
- Service: Facial
- Date: 18-12-2026
- Time: 11:00 AM

Sample Output
